

FIRE TANKS AUSTRALIA

CAPABILITY STATEMENT

QBCC Licensed

Setting The Industry Standard

AS1851-2012 Fire Tank Compliant

INDUSTRY LEADERSHIP

Our mission is to set the standard for the inspection, cleaning, and maintenance of potable tanks, fire tanks, reservoirs and waterways across Australia.

Our services include the inspection, cleaning and maintenance of all types of fire tanks, including commercial / industrial fire tanks, confined space tanks and fire suppression tanks. All of our services are carried out in accordance with Australian Standard AS1851-2012, guaranteeing safety and compliance.

“

We are committed to
professional excellence and community safety.

We are driven by a passion for the fire industry,
exemplified by our leadership in the field.”

WHAT SETS US APART

Actual Divers

Having a physical dive team inside the tank allows us to complete all tasks required by AS1851.

Many tasks are simply not possible when using remote operated vehicles (ROVs), which are widely used in our industry.

Transparency

We provide our clients with video footage and still photos of all services that take place inside the tanks from start to finish, with added capabilities to livestream where required.

Specialist Equipment

Our team of commercial divers use specialised, custom made equipment to safely clean and inspect your tanks without damage to your tank liners and with minimal water loss.

INDUSTRY EXPERTISE

Our team is made up of highly qualified and dedicated professionals, each committed to ensuring the highest standards in fire tank services.

We bring over 18 years of experience in the fire services industry.

Our commitment to transparency means we provide video footage of every job, giving you a clear view of the process from start to finish.

OUR SERVICES / FIRE TANKS

• SUPPLY & INSTALL

Tailored to your Specific Needs

Each fire tank is installed to meet strict AS1851 standards, ensuring reliable and efficient fire protection solutions. From initial consultation to final installation, FTA leads a seamless process tailored to your specific needs.

• INSPECT

A Proactive Approach

We conduct detailed inspections to identify any potential issues before they become serious problems. This proactive approach ensures your fire protection system is always ready to perform at its best.

• CLEAN

For Peak Operational Efficiency

We meticulously inspect and clean your tanks in accordance with AS1851, as we strive to ensure that your fire protection system operates efficiently and within its optimal life expectancy.

OUR SERVICES / FIRE TANKS

• MAINTENANCE

For Longevity & Performance

Our team of licensed professionals conduct thorough inspections and maintenance tasks in compliance with AS1851 standards. From routine checks to detailed repairs, we ensure your fire protection system remains reliable and efficient.

• REFURB

For Functionality & Compliance

We assess the condition of your tanks and implement tailored refurbishment solutions. From structural repairs to interior coatings, our expert team revitalises your fire tanks to ensure optimal functionality and compliance.

• LEAK DETECTION

Prevent Damage and Save Money

Our team of industry leading commercial divers use advanced techniques, including food dye, to accurately locate leaks. By identifying and treating leaks early, we help prevent further damage and maintain the efficiency of your fire protection system.

OUR SERVICES / CONTAMINATION DIVING

We specialise in contamination and zero visibility diving. We're leaders in effluent water, sewerage systems and other hazardous environments.

With our expertise, we ensure that all operations are conducted safely, efficiently, and in full compliance with industry standards.

Our cooperative approach means we work closely with our clients to understand their specific needs and deliver tailored solutions.

OUR SERVICES / DRINKING WATER RESERVOIRS

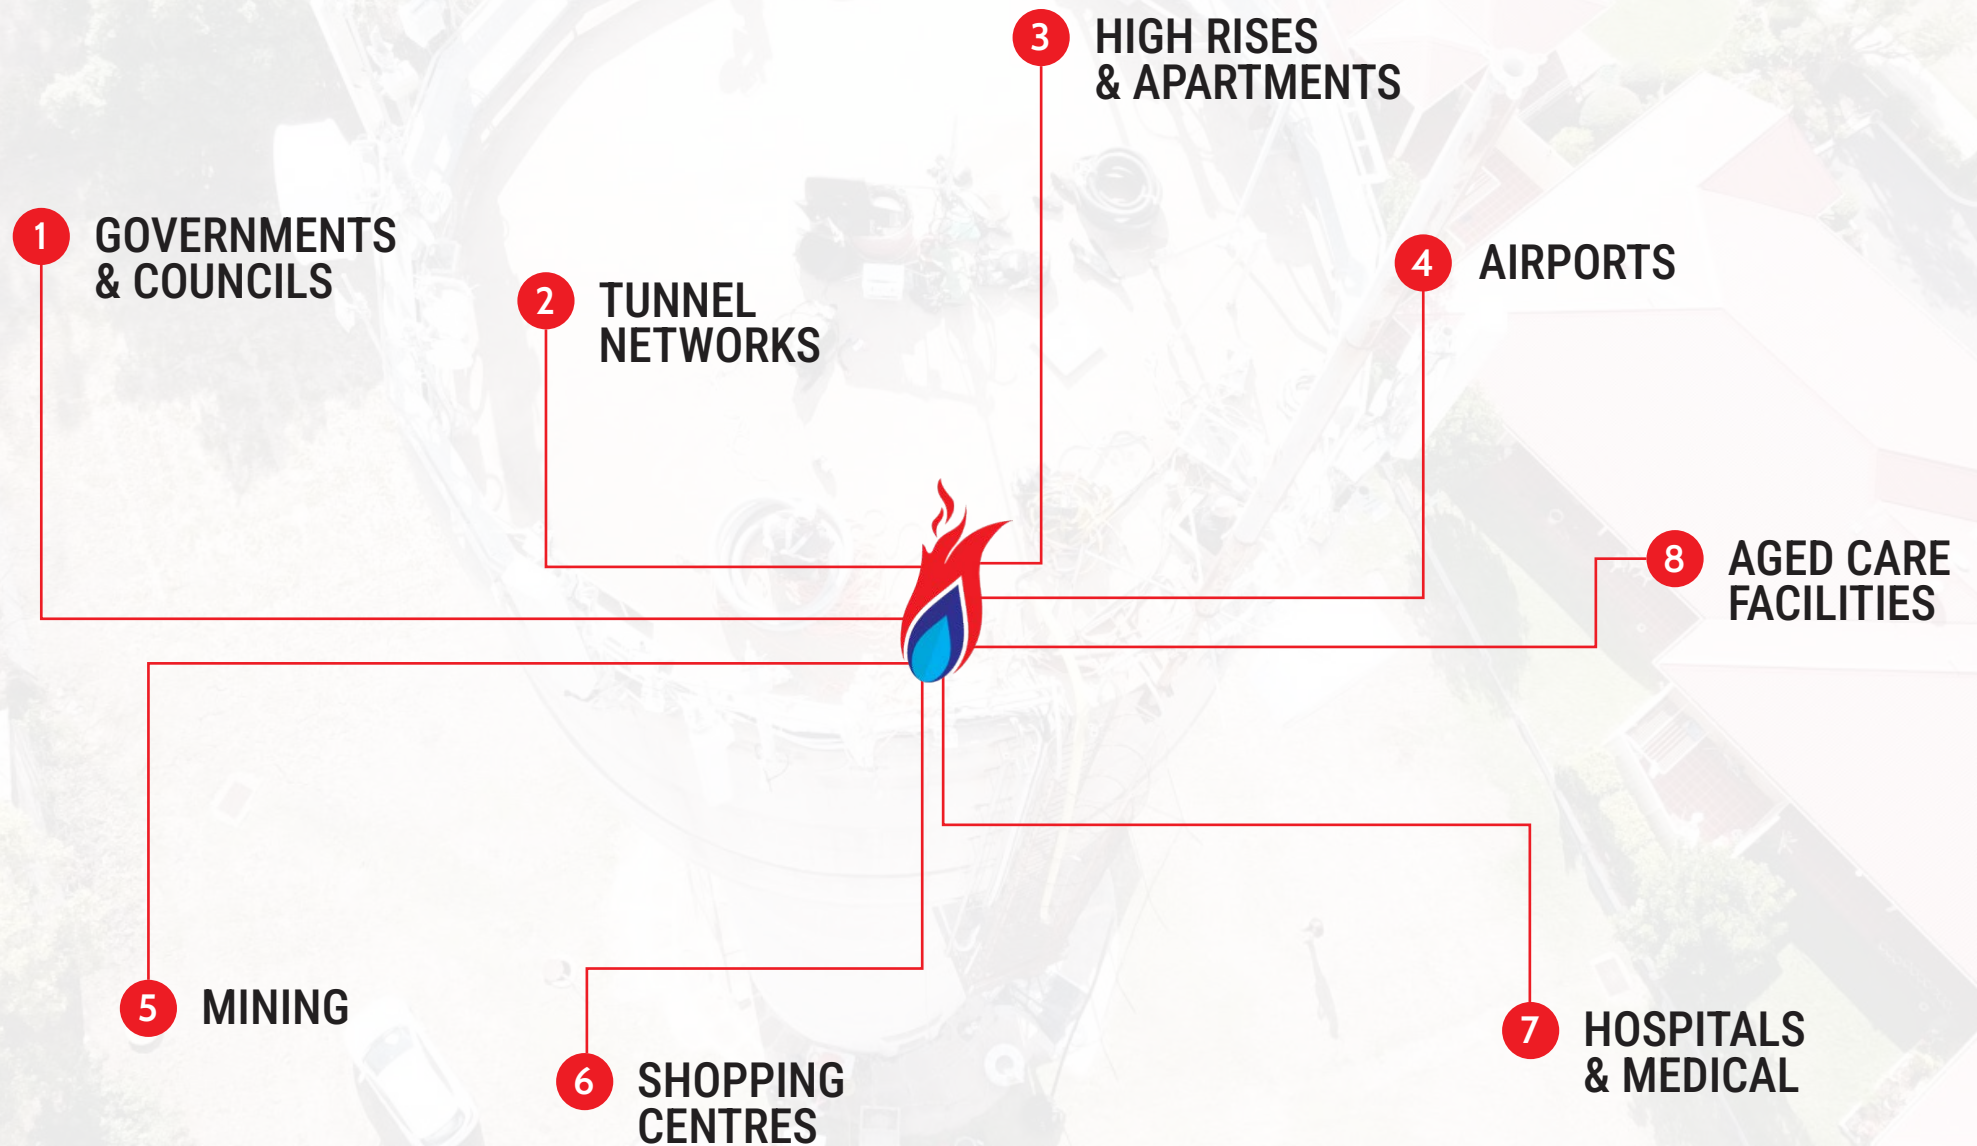

Potable water reservoirs are crucial for maintaining a clean and safe water supply.

Fire Tanks Australia specialises in the inspection, cleaning, and maintenance of these reservoirs to ensure they remain free from contaminants.

Our team of qualified commercial divers and advanced equipment allows us to deliver high-quality services with minimal water loss.

INDUSTRY FOCUS

FTA operate at a professional manner, reports received are comprehensive, inclusive of recommendations for rectification works found on cleaning the reservoirs. FTA keep a strong communication and commitment to their customer. FTA will go further than the scope of works to achieve to the goal. In my personal and professional opinion I would highly recommend FTA for any future works.

Gregory M

www.firetanksaustralia.com

We envision a future where all fire systems have a safe, unobstructed water supply and every Australian has access to clean water.
To achieve this, we aim to ensure that every tank and reservoir across Australia is properly cleaned and maintained and complies with industry standards.
